

Ricardo KONO

Senior fullstack developer — Java/Spring & Angular, architecture

✉ ing.ricardokono@gmail.com [in linkedin.com/in/ricardo-kono](https://www.linkedin.com/in/ricardo-kono) github.com/RickBker

◆ PROFILE

I design and ship robust end-to-end web applications: Spring APIs, Angular interfaces, clean architecture and tests, with a real production mindset.

I'm a senior fullstack developer specialised in Java/Spring and Angular. I've worked on payment and money-transfer platforms, business applications and large-scale production systems.

◆ PROFESSIONAL EXPERIENCE

Senior software engineer — Adservio (for RATP)

Sept 2023 – present

Interface between a CMMS and its external providers

- 4 applications maintained in production
- External providers served through read/write APIs and scheduled CSV exports
- Full autonomy over needs analysis, development and the quality of what is delivered
- Taking part in the daily meetings and team follow-up

Stack: [Java 11/17](#) [Spring](#) [Apache Camel](#) [OAuth](#) [Oracle / PL/SQL](#) [Shell \(cron\)](#) [Jenkins](#) [Dynatrace](#)
[JUnit](#)

Fullstack Java / Angular developer — Adservio (for SGE des IEG)

Nov 2022 – Aug 2023

Volunteer hours management and traceability

- Part of the team that delivered, from scratch, a platform replacing an Excel follow-up
- Hours allocated to resources with clear traceability for administrators and managers
- Taking part in needs analysis and UML design
- Taking part in architecture choices; hexagonal-architecture endpoints

Stack: [Java 11](#) [Spring Boot](#) [Spring Security](#) [Angular 13](#) [PostgreSQL](#) [Cypress](#) [Jasmine](#) [Mockito](#)
[AWS](#)

Solution architect & fullstack Java / Angular developer — Digipay

Sept 2020 – Aug 2022

Digitransfer money-transfer platform

- Part of the team that delivered a full platform: backend, admin and mobile
- Contribution to the microservices architecture design
- Taking part in the microservices architecture design (API gateway, caching)
- Building Java/Spring microservices, including User Access

Stack: [Java 11](#) [Spring](#) [Angular 10](#) [Ionic 4](#) [JSF](#) [AWS](#) [JUnit](#) [Cypress](#) [Jasmine](#)

Senior frontend developer — Sprintpay (for Ministère des finances du Cameroun)

Feb 2020 – Aug 2020

SYAMPE: electronic payment aggregation

- Angular modules delivered with the team for a government platform
- Contribution to the mobile app for receipt verification
- Taking part in analysis, design and the microservices architecture
- Building several Angular modules with JHipster

Stack: [Angular 8](#) [JHipster](#) [PostgreSQL](#) [Docker](#) [Jenkins](#) [Cypress](#) [Jasmine](#)

Senior fullstack PHP / Angular developer — Peers Exchange

Jul 2019 – Feb 2020

International money transfer

- Part of the team that delivered the backend, admin and mobile of a transfer platform
- Taking part in the backend web services with Laravel
- Service access security process

Stack: PHP 7 Laravel Angular 7 Ionic 3 MySQL TypeScript Jasmine

Senior fullstack developer — Freelance

Jan 2019 – Jul 2019

Property rental platform

- Platform built solo, end to end: API, administration and mobile
- Technical specifications, analysis and design
- Java/Spring backend and access security

Stack: Java 8 Spring Angular 6 Ionic 3 MySQL GitLab

Fullstack developer & Tech Lead — Gibraltartech

Mar 2017 – Jan 2019

Kloonos: social market platform

- Tech lead of a team on a web and mobile platform
- Needs analysis, API design and implementation, with the team
- Backend modules (web services) and access security

Stack: PHP Symfony 4 Angular 6 Ionic 3 MySQL PHPUnit Jasmine

Java / Angular developer — LCI (La Centrale Informatique)

Jan 2014 – Feb 2017

iSante: pharmacy directory

- Contribution to the backend modules, the native Android app and the admin
- Taking part in the Java backend modules
- Taking part in the native Android application

Stack: Java 8 AngularJS Android MySQL JUnit

◆ SKILLS

Backend	Java · Spring Boot / Spring Security / Spring Data · PHP (Laravel, Symfony, Doctrine, Eloquent) · JavaEE, JSF / PrimeFaces · Apache Camel, JHipster · Serveurs Apache, WildFly
Frontend & mobile	Angular · TypeScript · JavaScript, jQuery, AngularJS · Bootstrap · Ionic / Flutter (Dart) · Android natif · Intégration de maquettes Figma
Data & APIs	JPA / PostgreSQL · SQL, MySQL · Oracle (PL/SQL) · Firestore · API REST, OAuth2, JWT · JSON, SOAP, Socket
Architecture	Architecture hexagonale, DDD · Microservices & monolithe modulaire · SOLID, Design Patterns, Clean Code · UML, Merise · PowerAMC, ArgoUML
DevOps & cloud	Docker, Kubernetes · CKA, CKAD · GitLab CI, Jenkins · Git · AWS, Google Cloud · Heroku, SSH · Linux (Ubuntu), Windows, macOS · Dynatrace
Methods & quality	TDD / BDD · Agile / Scrum · JUnit, Cypress, Jasmine, Karma · Mockito, PHPUnit · Jira, Trello, Gantt, Mantis · IntelliJ IDEA, VS Code, NetBeans, Android Studio

◆ EDUCATION

- **2016** — Master's degree (M2) in IT Project Management
- **2014** — Bachelor's degree in Software Engineering

◆ CERTIFICATIONS

- **2025** — CKA: Certified Kubernetes Administrator
- **2025** — CKAD: Certified Kubernetes Application Developer
